

## Signal Alarm Tower

### Model SAT-1

The SAT-1 is a tower light stack with an audible alarm that may be used to indicate various states of operation when connected to Eco Sensors instruments including the OS-4, OS-6, C-30ZX, EE-2, OEM-1, OEM-2, and UV-100. The indicator lights and audible alarm are controlled by relay contact closure.

The SAT-1 has interchangeable stacking light modules that may be customized after purchase.

The SAT-1 can be mounted on new OS-6 orders at the Eco Sensors factory or ordered separately and installed by the user. Hardware is included for direct mount only.

### Specifications
